Victory Range: Sheltered Livestock Building.

The '**Victory**' is designed to offer sheltered accommodation for livestock with a 4'6" canopy to keep feed and bedding dry. A key feature is that the ridge is central to the overall span keeping the gutters at identical heights and thus preserving clearance under the canopy. The alternative method often seen is to attach a separate canopy to one side which reduces the clearance by 14" (360mm) and creating problems when trying to drive machinery below the overhang. A further benefit is the more balanced appearance of the building.

Available in 30', 35', 40', 45' and 50' overall spans, the base building is 60' long in four 15' bays and includes a fibre cement roof with rooflights, 7"X3" treated timber purlins and 6" 'Hunter' brand StormFlow gutters and downpipes plus all the bolts and tek screw roof fixings you need.

The sturdy steel frames have properly haunched and gusseted connections and include roof and side bracing. Purlin cleats are fabricated from 8mm angle to provide proper seating for the timber and set at maximum 4'6" spacings. Baseplates are minimum 10mm thick (12mm above 40' spans) and punched to accept foundation bolts (included in the kit). The steelwork can be supplied either painted with a high build rust resistant primer or Galvanised.

In all cases the posts are designed to be bolted on a foundation base 18" (450mm) below floor level and have an overall length approximately 13'6" (4725mm).

There is a wide selection of side cladding options available in either plastisol coated steel or yorkshire boarding on a "Pick & Mix" basis, additionally if you prefer to supply your own vertical cladding you can order the necessary gable and door posts separately.

Please note that the base building does not include side cladding to the gable peaks because we have found that many of our customers intend to fit side cladding later and matching the existing peaks is inconvenient. Almost invariably the cladding is thrown away and replaced which is a waste of time and money. If you intend to clad the building later we would suggest that you purchase additional gable posts with the kit.

If you need a building longer than 60' then extra bay kits are available which include an extra portal frame, purlins, roof cladding, rainwater goods and fixings.

Victory 35 Specification Sheet

	v	Issued 03-12-09
Overall Span	35'	10668mm
Overall Length	60'	18288mm
Height from Floor to Top of Steel	12'	3658mm
Height from Floor to Top of Eaves Beam	12' 5 1/2"	3797mm
Depth from Floor to Top of Concrete inc. pack	1'6"	450mm
Overall Length of Post inc. pack	13'6"	4115mm
Roof Pitch	15 degrees	
Height to Apex	17' 3 3/4"	5275mm
Clear Height Under Eaves Beam	11' 10 5/8"	3622mm
Floor Area	2100 sq ft	196.2 sq m
Column Section	7"x4"x12.75 lb/ft UB	178x102x19 kg/m UB
Rafter Section	7"x4"x12.75 lb/ft UB	178x102x19 kg/m UB
Roof Bracing	3" OD Tube	76mm OD Tube
Side bracing	2"x2" Angle	50x50 Angle
Roof material	Fibre Cement Natural grey	
Ridge Type	Ventilating or Closed or Alternating	
No. of Rooflights	8	
Barge Boards	Fibre Cement Natural grey	
Purlins	7"x3" Treated Timber	175x75mm
Roof fixings	Top Fix Self drilling Screws	
Main connection Bolts	M16 High Tensile Zinc Plated	
Rainwater Goods	Hunter 6" Half Round PVC Black	
Side Cladding	Optional
